This firm was created in 2008 in order to cover specific needs of corporations dedicated to develop real estate businesses in Argentina and doing debt recovery for foreign companies. We especially work for UK insurance companies. The main concern of this law firm is to be flexible in order to adapt the legal services to the different clients' requirements. We advise and work in a wide variety of fields, such as software companies, real estate developers (hotels, building constructors, private neighbourhoods and agricultural projects). We create legal structures for our clients, particularly trusts funds and collateral agreements. During these years we have participated in M&A operations in broadcasting and agricultural companies.

We represent different types of clients as Nogales de Entre Ríos (where Dr. de Ibarreta is president) one of the biggest pecan companies in South America, or CALF corporation (where Dr. Silva was the president) which is a public power company that provide energy in Neuquen province. Our philosophy is to give a quick and personalized answer to our clients' requests, as well as a fluent communication and committed team work.
